PROJECTS

FinFlow

- Developed a full-stack MERN Finance Tracker application with 4 main pages: Dashboard, Transactions, Income, and Expenses.
- The Dashboard tracks 100+ recent transactions, salary, expenses, total income, total expense, and total balance, featuring an interactive graph of income vs expenses.
- Designed and built 10+ reusable UI components, ensuring responsive layouts for mobile, tablet, and desktop devices.
- Created RESTful API endpoints for efficient CRUD operations on income and expense records, ensuring data integrity and consistency.

DashMaster

- Constructed a full-stack dashboard application with 4 main data visualization types using Material UI and Material UI Data Grid.
- Spearheaded authentication system with 3 user roles (admin, basic user, viewer) using Node.js and Express.js.
- Integrated 4+ essential dashboard features including data filtering, sorting, and export functionality using Redux Toolkit.

InteractCV

- Built a 3D portfolio with 2 interactive Three.js models and 3 animated sections using Framer Motion.
- Designed 10+ reusable React components including navigation, project cards, and contact forms.
- Established responsive design across 3 breakpoints using Tailwind CSS for consistent user experience.
- Configured Vite for development and successfully deployed across multiple platforms including Netlify and Vercel.
